

Folding curtain front

free-hanging without floor profile 404

The folding curtain 404 also offers an innovative solution for closing niches and openings or dividing rooms. The folding curtain is guided at the top in an aluminium profile, but - unlike its „brother“ 444 - does not require a floor profile. In this way, attractive solutions can be realised for every situation, whether in private or public buildings.

The pictures impressively show the versatility of the 404 folding curtain and its possible uses in different situations. In an open-plan office, for example, it acts as a flexible partition that not only provides a clear structure between the different work areas, but also helps to dampen acoustics. This creates a pleasant working atmosphere that promotes concentration and productivity.

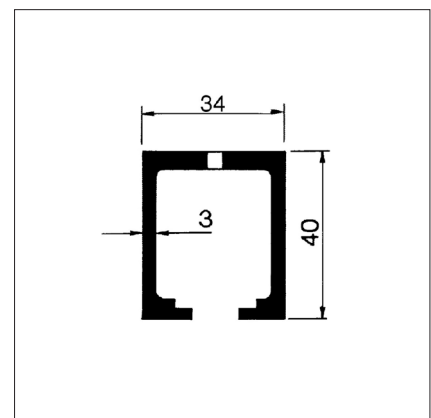

In addition, the 404 folding curtain is ideal for separating rooms and passageways, allowing individual areas to be created to meet the needs of users. Regardless of whether the aim is to create places of retreat, meeting rooms or simply a visual separation. The folding curtains from Thut offer the right solution for every challenge on site. Their flexibility and functionality make them an ideal element in public spaces, working environments and private homes.

Without floor profile.

Ceiling profile embedded in ceiling.

Ceiling profile detail.
