

The system shelf is variable in depth, height and width, and different heights and depths can be combined with each other. It can be fitted with drawers, pull-out shelves, wire baskets, clothes rails, side panels and can also be supplemented with the folding curtain front. It is ideal as a free-standing shelf, but can also be used on the wall or as a built-in solution - whether in the reception area, in the office or in the home.

### Dimensions of the system shelf

Height from 303 to 220 / from 219 to 126 / 125 to 70 cm

Width 68.8 cm per compartment or made to measure

Depth 61.6 / 41.6 or made to measure

The system shelf adapts to any niche. It consists of aluminium beams and galvanized steel diagonal braces on glides. There are two standard depths and one standard width. We can also manufacture any desired shelf dimensions. The shelves are available in light gray and black, and in other designs and materials on request. A basic element consists of four uprights and diagonal braces. The basic element can be extended as required using the extension element with two uprights and diagonal braces.

### Equipment

Depending on the required depth and width, the system shelving can be fitted with shelves, pull-out shelves, clothes rails, drawers, wire baskets and clothes lifts and supplemented with a folding curtain.

System shelf, 207 x 108 cm

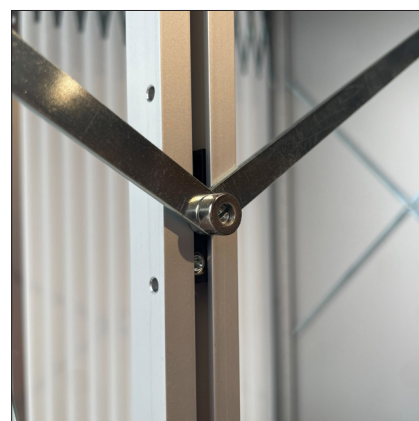

### System shelf details

Shelf lying on shelf support

Adjustable foot to compensate for uneven floors

The crosses are connected at the back with magnets. This means the shelf can be easily rearranged

Dimensions and designs are subject to change without notice.

The depicted colours are not binding. Please ask for our material samples.
