

Folding curtain

with floor profile 444

Laundry tower cover in the bathroom area

The folding curtain front provides an innovative closing solution for cupboards, sideboards, counters and individual fixtures as well as for concealing niches or dividing rooms. Various designs are available, and the variety of colors and materials opens up numerous design options. The folding curtain is guided in an aluminum frame, which consists of side and ceiling profiles and can optionally (model 404) also be used without floor profiles. This makes it possible to create aesthetic, functional and acoustically appealing solutions for any room, both in private and public areas.

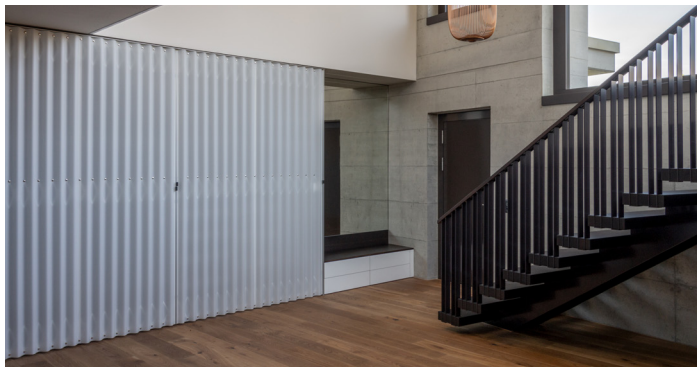

1. separation between workspace and living area

Anwendungsbereich

These two examples show how the folding curtain can be used in style:

1. the semi-transparent separation between the workspace and the rest of the living area is elegantly emphasized by the curved front of the curtain. The canvas made of Dacron allows the light to shine through gently, creating a bright, inviting atmosphere.
2. this design with the folding curtain essentially focuses on creating a large partition that skillfully separates the entrance area from the required storage space.

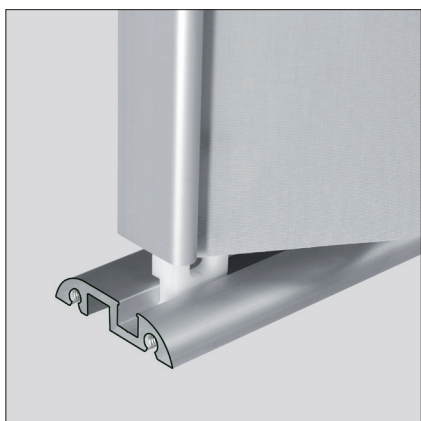

2. separation of entrance area and storage space

Overview profiles
